

Finishing **Apply specified finishes of standard complexity to concrete surfaces**

Kaupae Level	3
Whiwhinga Credit	15
Whāinga Purpose	This skill standard is intended for people working in or entering the construction trades. People credited with this skill standard have the skills to form specified finishes of standard complexity on concrete surfaces under limited supervision. This skill standard aligns with the New Zealand Certificate in Concrete Construction Skills (Level 3) [Ref: XXXX] and may also contribute to other construction and infrastructure qualifications.

Hua o te ako me Paearu aromatawai | Learning outcomes and assessment criteria

Hua o te ako Learning outcomes	Paearu aromatawai Assessment criteria
1. Form specified finishes on concrete surfaces.	a. Aggregates and chemical compounds are prepared and used as required by plans and specifications.
	b. Tools and equipment are prepared and used with correct technique for the intended application.
	c. Finishing techniques are applied to achieve specified finishes required by the plans and specifications.
2. Wash and seal concrete surfaces.	a. Surfaces are washed to expose or texture concrete as required by specified finishes.
	b. Sealing methods are applied to protect and complete specified finishes.
	c. Protective actions are implemented to prevent stormwater and surrounding areas from being contaminated by concreting waste.

Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria

Assessment specifications:

To achieve this standard the candidate must be capable of carrying out specified finishes of standard complexity on concrete surfaces under limited supervision to industry standards.

Industry standards must reflect industry best practice, workplace procedures, and be within acceptable tolerances as defined in New Zealand codes, standards and regulations.

Plans and specifications can include working drawings, plan specifications, manufacturer specifications, installation instructions and demolition and project plans.

Under limited supervision refers to candidates carrying out the requirements of this skill standard with basic guidance and indirect supervision from a suitably skilled tradesperson. They are expected to source some information independently from plans, specifications, or relevant New Zealand Standards and apply these to routine or familiar projects.

Standard complexity refers to common workplace finishes using familiar tools and techniques. It may include finishes such as steel trowel, float, broom, screed, power float or textured finishes applied to straightforward concrete elements.

Evidence for this standard must be demonstrated:

- to current and relevant Legislation, Standards, and Codes (including safety),
- in an environmentally sustainable manner, and
- with acceptable behaviours.

Ngā momo whiwhinga | Grades available

Achieved.

Ihirangi waitohu | Indicative content

- Plans and specifications
- Aggregates for exposed and decorative finishes
- Chemical compounds for surface treatments (retarders, hardeners, stains, dyes, sealers)
- Tools and equipment for finishing, washing, and sealing
- Protective measures and personal protective equipment
- Finishing techniques (steel trowel, float, broom, screed, power float, textured finishes)
- Washing methods (e.g. water blasting, brushing, scrubbing)
- Sealing methods
